

My name is Yonas Tesfay and my student number is 3842105. I was born in Australia, but my background originates from Ethiopia in East Africa. I am interested in playing and watching basketball, playing games, watching anime as well as reading adventure, crime/mystery and horror novels. I am interested in IT mostly because you can find jobs that are sustainable in our current time and society as well as being able to attain a good salary. My interest in IT started during my final year of High School, I was struggling to decide what course I should attempt next year and came across IT, I had always during my time in high school wanted to learn about computers, programming and all the differing facets of the internet and that completely divergent world that I had never questioned or known much about. I have zero IT experience and have chosen to come to RMIT due to their reputation preceding themselves regarding their IT and other technology related courses. I expect to take away so much about the online world and the internet as well as how to be able to understand and execute methods and strategies that include coding and programming.
