Jonathon

Jonathon showed excellent ability to create the draft for our website and also setting up the GitHub Repository where we store all our work. He made the work very easy as sending and receiving files were very easy and simple. This allowed us to have quality work and dedication towards the assignment.

Yonas

Yonas as a group leader was very organised. He successfully assorted us into our roles and assigned us the relevant tasks we had to do. He also was able to be flexible with us despite our busy and personal lives to set a time for meetings in which we could all participate. Yonas also completed his work first which was essentially leading by example for the rest of us.

Alan

Alan played a very big role and part within our group. He always reminded us to complete our work and would often look over our parts to proofread and give feedback where necessary to improve the quality of work. His own work was also levels above the rest which showed his effort and dedication to the assignment. At times he would also help Yonas to assign any extra roles or jobs to the rest of the group to improve our assignment. Overall Alan was a very important individual within our group.
